

Ferrolux Sensing

FLS-30: Photoelectric Sensor

The FLS-30 is a diffuse-reflective photoelectric sensor for object detection on packaging and sorting lines. A background suppression mode ignores the conveyor belt itself and reacts only to the object passing in front of it.

Technical Data

Sensing distance	10-300 mm
Response time	1 ms
Supply voltage	12-24 V DC
Output	PNP / NPN selectable
Operating temperature	-20 °C to +60 °C
Housing	ABS, black
