BC-500: Pressure Transmitter

The BC-500 converts hydraulic and pneumatic pressure into a linear 4-20 mA signal for direct connection to a PLC analog input.

It is rated for continuous operation across an ambient range of -20 °C to +85 °C, which covers most outdoor installations without additional enclosure heating.

Technical Data

Pressure range	0-400 bar
Accuracy	0.5% of full scale
Output signal	4-20 mA, 2-wire
Ingress protection	IP65
Supply voltage	10-30 V DC
Weight	180 g
