## SVK-12: Temperature Transmitter

The SVK-12 converts a Pt100 or thermocouple input into a scaled 4-20 mA or 0-10 V output for panel-mount or head-mount installation.

Two-point calibration against a reference probe is recommended after installation, especially for thermocouple inputs.

### Technical Data

|                           |                                       |
|---------------------------|---------------------------------------|
| Sensor input              | Pt100 / thermocouple J,K,T            |
| Output signal             | 4-20 mA or 0-10 V, configurable       |
| Accuracy                  | 0.2% of span                          |
| Ambient temperature range | -30 °C to +80 °C                      |
| Supply voltage            | 12-36 V DC                            |
| Housing                   | Polycarbonate, DIN rail or head-mount |
