KST-750: Ultrasonic Level Transmitter

The KST-750 measures fill level in tanks and silos without contact, using an ultrasonic pulse reflected off the surface of the product.

It is intended for permanent installation on open or closed vessels in food, water treatment, and bulk solids handling.

Technical Data

Measuring range	0.3-8 m
Accuracy	± 3 mm
Output	4-20 mA, HART
Enclosure rating	IP66
Working temperature range	-30 °C to +75 °C
Supply voltage	12-30 V DC
Process connection	Thread G1 1/2
