

Panvara Controls

PVC-220: Safety Relay Module

The PVC-220 monitors emergency-stop and safety-gate circuits and removes power from the connected contactors when a fault is detected.

It is rated for cabinet installation and operates over an ambient range of -10 °C to +55 °C, which covers standard control-cabinet conditions without additional cooling.

Technical Data

Safety category	Cat. 4 / PL e
Input voltage	24 V DC
Response time	< 20 ms
Housing protection	IP20
Mounting	DIN rail
Weight	210 g
